

ANTI-VIRUS 2010

Easier, More Powerful Antivirus

F-Secure® Anti-Virus™ 2010 offers better protection against viruses without slowing down your computer. The completely redesigned new version offers significantly improved performance and enhanced protection against viruses, spyware, infected e-mail attachments, and other malware. Automatic updates and advanced DeepGuard™ cloud computing technology ensure the fastest protection against new threats. Extensive studies conducted together with our users have helped us create a user experience that sets a new standard for safe PC use. All problems are handled without disturbing you—only receive notifications that confirm your continued safety.

Redesigned Protection

Redesigned scanning technology means that threats are detected quicker and more accurately than ever before. Automatic updates and advanced cloud computing technology ensure the fastest protection against new threats. Major performance improvements mean faster and smoother operation so you get more out of your computer while staying protected.

Protect your Privacy with Antispyware

Spyware can secretly track your surfing habits and profile your shopping preferences. It can even hijack your web browser or abuse your Internet connection by sending data to a third party. F-Secure Anti-Virus protects your privacy by quickly detecting and removing such software from your computer.

Better User Experience

Extensive usability studies have helped create a user experience that sets a new standard in safe PC use. All problems are handled automatically, so you'll only receive notifications that confirm your continued security.

Key Features

Protects your computer against viruses, worms and other malware

Real-time protection against viruses, worms, and other common malware. Automatically updated protection from world-renowned F-Secure Labs and F-Secure DeepGuard cloud protection against unidentified threats ensure your computer is protected, now and tomorrow.

Detects and removes spyware from your computer

F-Secure Anti-Virus removes secretly installed software from your computer, ensuring that your system is running smoothly and free of spyware.

Fastest Protection

F-Secure is a leading antivirus vendor, recognized for its rapid response and update delivery times during virus outbreaks.

Easy to Install and Use

F-Secure Internet Security is extremely easy to install and use. Because software updates are automated, there's no need to be concerned with the complexities of data security. The completely redesigned user interface based on extensive usability studies sets a new standard in safe PC use.

Browsing Protection Ensures Your Online Safety

The new browsing protection feature tells you which websites are safe to enter and which you should avoid. Harmful sites are blocked automatically to ensure safe surfing.

The Fastest Protection Against All Threats

Frequent automatic updates and advanced DeepGuard cloud computing technology ensure the fastest protection against all new threats. Immediate reaction times and fast cures during new and emerging threats are guaranteed by F-Secure Labs working 24 hours a day worldwide.

Software in Your Language

F-Secure Internet Security has a simple user interface, including an easily accessible electronic manual. Both the software and electronic manual are available in your language.
